Project Design Phase-I
Solution Architecture

Date	19 September 2022
Team ID	PNT2022TMID33439
Project Name	Personal Assistance for Seniors Who Are SelfReliant
Maximum Marks	4 Marks

Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridges the gap between problems and technology solutions. Its goals are to:

- People tend to forget things such as taking their prescriptions

- Our model contains the alert services and also works as a reminder

- This model uses the cloud thechnology for database and can generate a report on daily basis

- It should require the medical information . The user needs to update the model frequently for new updates
